

First Volo Morphology

Grades 2-3 Morphology Progress Monitoring Probe

Educator Guide

Purpose

A brief, informal progress-monitoring measure of morphological knowledge and independent word-solving. Forms A and B are parallel forms that may be alternated across administrations to monitor change over time. This is not a standardized assessment or an official Common Core assessment.

Administration

- Directions, target words, sentences, and answer choices may be read aloud.
- Do not define a target word, identify its parts, or tell the student what a morpheme means during scored items.
- Repeat directions if needed without teaching the answer.
- **Record the student and educator information appropriate for your setting and follow local school or district privacy procedures.**
- **For a clearer measure of transfer, avoid directly teaching the exact probe words between administrations when possible; teach the same morphemes in other words.**

Progress Monitoring Use

Alternate the forms

Use Form A for one administration and Form B for the next, then continue alternating forms as appropriate. Record instructional sessions, approximate minutes, activities used, engagement, and independence when useful. Interpret small changes cautiously because only two parallel forms are available.

Educator Scoring & Standards Map

Grades 2-3 Forms A and B

Give 1 point per item. For Item 11, require both the correctly formed word and an essentially correct meaning. For Item 12, require both an essentially correct whole-word interpretation and a reasonable explanation connecting the word part to meaning.

#	Skill	Form A / Form B answer	CCSS	Alignment

Optional Mediated Probe - Do Not Add to /12 Score

After the independent response is recorded

If a student misses Items 7-10 or 12, the educator may then provide the relevant morpheme meaning and ask again. Record only whether the student becomes correct after the cue. This can help distinguish retention of the morpheme meaning from the ability to apply a supplied morphological clue.
